**REPORT OF EXAMINATION**

To: Chicago Police Department  
3510 South Michigan  
Chicago, Illinois 60653

Date: December 21, 2011  
Case ID No.: N/A

PO Daniel Willis

Lab No.: [REDACTED]

Reference: Communication dated December 12, 2011

Ref. No.: CR#1050637

Title: INTERNAL INVESTIGATION

Date specimen received: December 21, 2011

Specimens:

Submitted and Examined:

CGR CFL057728: Dell Desktop Computer:  
Make: Dell  
Model: DDCY (Optiplex 745)  
Serial Number: J4RRWC1

CGR CFL057729: Hard Disk Drive  
Make: Western Digital  
Model: WD800JD-75MSA3  
Serial Number: WMAM9MS75199  
Size: 80 Gigabyte (GB)

Request:

In a communication dated December 12, 2011, PO Daniel Willis of the Chicago Police Department requested that the Chicago RCFL process the submitted evidentiary items for any images of pornography and any internet history related to possible adult web sites..

Opinions and Conclusions:

None

Summary of Examination:

The submitted evidence hard drives were processed and examined using approved forensic tools. Images of possible pornography and internet history related to adult web sites were located and noted. PO Willis reviewed the case and requested noted files as derivative evidence.

Details of Examination:

Submitted evidence was checked out of the Chicago RCFL's Evidence Control Room in a sealed condition. CGRCFL057728 was found to contain one hard drive which was barcoded CGRCFL057729. CGRCFL057729 was write-protected and an image was made to a dedicated case folder located on a Storage Area Network (S.A.N.). A logical copy of the image file was made to blu ray disk (CGRCFL057739) which was then placed into the Evidence Control Room. Data integrity was verified both before and after the examination. Hardware and system information was checked and recorded including partition type and size. Date and time of CGRCFL057728 was checked and found to be set to current Central Standard Time with the current date. Values to verify the data integrity of each file in the image copy were calculated. These values were compared to a database of files known not to be of any evidentiary value and a database of identified suspected child pornography with no hits being recorded. The image copy was searched in order to identify files and these files were categorized by common file types. For each file located, full text indexing was conducted. A test was performed to determine if a file was compressed or encrypted. Deleted files were recovered. A full directory and file listing was generated for files contained in CGRCFL057729. Files were viewed and multiple files of possible pornography and internet history related to adult web sites were located and noted. The case agent reviewed the examination and requested selected items as derivative evidence. The results requested by the case agent were burned to two CD-Rs (CGRCFL057991 and CGRCFL057993) for the agency and one CD-R (CGRCFL057995) for the RCFL. After the examination, a logical copy of the working drive was made to ultrium tape (CGRCFL057997) and placed into evidence control. The verification logs were burned to CD-R (CGRCFL057999) and inventoried.
